

VetCat Trap is an advanced plexiglas tube with a removable top keeping the veterinary patients in a neutral sternal position.

The benefits of VetCat Trap:

- CT scans without the risk of sedation or anesthesia.
- Low-heat, comfortable and nurturing environment for small pets.
- Symmetrical design with ports in each end for catheters and oxygen lines.
- CT images without artifacts.
- Staff can monitor small patients inside.
- Faster diagnosis for more effective treatment of life-threatening diseases.

VetCat Trap provides the higher level of imaging with the least effects on small patients.

VetCat Trap

The CT on small pets without anesthesia.
